

DAC-40512

# Heavy Duty Silicone Mold Release

## Why was HEAVY DUTY SILICONE MOLD RELEASE developed?

DAC's Heavy Duty Silicone Mold Release was developed to give you a superior film strength that will enable molders to go many more cycles before having to re-spray.

## DESCRIPTION:

Heavy Duty Silicone Mold Release was formulated to give a higher level of film strength by using fluorocarbons and silicone combined to eliminate the vacuum hydraulic effect which causes releasing problems. It works well on hot and cold molds. It is CFC free, free of chlorinated solvents, non-toxic, odorless and good for temperatures from 60°F to 600°F. Heavy Duty Silicone Mold Release has no volatile organic chemicals (VOC's). It imparts a smooth, dry film, which is biodegradable and non-toxic. It is FDA and USDA approved for food machinery.

## PERFORMANCE CHARACTERISTICS:

- Eliminates vacuum hydraulic effect and any releasing problems
- Superior film strength that will eliminate frequent spraying
- Built in fluorocarbons allow easy release in deep ribbed areas
- Solvent free, providing you with the flexibility to be used on highly sensitive plastics
- Good for temperatures ranging from 60°F to 600°F

## REMOVAL SPECIFICATIONS:

If build-up occurs, flush with DAC-103 Universal All Purpose Degreaser.
